Shit happens. It is software, and the authors mod are amateurs who enjoy sharing their fantasies with the community. Keep it often. The console is not a high-end PC. Unfortunately, the limits set by the developers are there for a reason. Plan your load order before downloading and using mods in a responsible way to avoid breaking your console. Obey the Rule of One. The mods are not merged in the execution time. That's why the cargo order is so important: What's below will override what's above. Some mods will simply not work if another mod is blocking what a mod needs to work. Mods that alter or reconstruct precombines will not work with others that will also rebuild them. Blank Charging Frame Template Download a copy of the Blank Frame Template to help you keep your charge orders out of the game. Build your Framework while planning your progress. Download BlankLoad's Frame Template Survival guideTotally new to modding your game or need a refresher after a hiatus? How-a and placement example mod: Vault Dweller survival guide for load orders. Questions? If you have questions about specific mods that have not been included in the guide, please join us in the Parent Server and ask your questions there. Note that the answers to your questions can depend on other mods in your cargo order so have your useful framework link to share with us. Support If you are having difficulty, frustrated, or simply want to connect with other mod users and discuss how mods work together, come join the discussion on the Parent Server. Terminology and Jargon If you are totally new to add mods to your game, we have a list of commonly used terms and jargon al al ed ortned o bew oitis ortseun ne setneucerF satnugerP sal rev ,ogeuj us a sdom ragerga la samelborp sorto rartnocne o ,"odatelpmoC oN n³ÃicarepO" ,sollaf odnatnemirepxe ¡Ãtse detsu iS samelborp ed n³ÃiculoS .dom senoicpircsed ne nartneucne es of the Survival Guide. Category Definitions The game reads each plugin that downloads and maintains an index of it. Use the frame categories below to build your frame index. What's down will override the top. You can find example mods along with other information about certain mods in the A Vault Dweller Survival Guide for load orders. See the Loading Order FAQs to learn the differences between conflicts, incompatibility and annulment. Using Cheat Mods: Cheat Mods allows you to jump things that can or may not be codified hard and therefore could cause game errors not normally seen in the game. Save often and only use a cheat mod. The report of errors with activated trap mods is by its own impossible nature. Master Files These automatically jump to the top, order them in the same order as everything else. If the unofficial patch is used, it should be the first mod on your cargo order so that other mods can cancel it unless specified by an MA whose mod records should be cancelled by the unofficial patch, as is the case of Clean My Settlement REDUX. Example ModsArmor & Weapons Keywords Community Resources (AWKCR)Lodging SimpleGreenUnclosed Liquidation Objects Unclosed Fallout 4 Patch Mods that are ESLs will load before all the other mods generated by the user regardless of where the game administrator locates them. Start and quick frames SKK's quick startups will have to work as high as possible when using them. This category is reserved for those mods. Plugins/patches for masters that are not affected by the following categories also will go here, such as the DLC patches for NAC. Faction and AI OverhaulsEnemy level listsFaction level lists Intelligence packages Example Mods Distributed DLC Level listsNewsNew creation Club VR settlements or works size DLC. The vanilla world editions approach the background due to the Fallout 4 optimisation system. New factionsNew factions that are NEW enemy factions and lists or need to overwrite the faction lists above. These areLists of enemy and faction levels. Those who have world editions will go with modifications that add world editions. Example of Modscapital Wastemothsvanilla Modifications. Most error corrections are now contained in the Fallout 4 unofficial patch. Modifications that affect HC_Manager and HC_Managerscript survival mode go here (only use a mod that touches HC_Managerscript). This section may contain patches to vanilla missions that have no effect and are not affected by any modified below. Patches for creation creation creations that have no effect on the categories below can be placed here. (Previously called bug fixes, unofficial patches) Example of modsv.a.t.s. Freeze Fixmods that present vanilla dialogue changes FollowersSurVival ModeWorkshopsSettlement and Elements from the workshop menu (vanilla menus) that are added to your menu with vanilla keywords, without revisions or replacement of mesh. The menus are considered "longer editions" to the lists of vanilla workshop menu forms. Many PS4 single construction modifications fall into this category. Example of extended modsman modsman's extended interactive work that does not adapt to cat's work objects assignments of object assigned with municipalities and elements of the workshop menu) through script injection. Construction mods with a Modsetlement menu manager from Holotape or Chem.Enterm. Any modification required by Smmcustom Vanilla ObjectS Creative Deslice DlcDead Wasteland Specialized Menuspre-SMM ScriptingSettlement Manager Pluginswarningall Mods in this section Enter the menus if they are deleted incorrectly. The menu of establishment and workshop Overhaulsmods that alter the items in the menu;Additional snap; Men º Overhaulsexample Modsvanilla Extensionsshop reorganized Adondspaches for the workshop reorganization of game changes and settings adjustment on how the game is played. Game configuration Survival mode of the mechanical survival of vanilla game games game and the effect level of the list list perk mods due to Engine Bug. PS4 Players should use caution with perks that all you to have all the perks at once on top of being leery of perk mods in-general due to game bug.New Companions and PetsNew companions that are added to the vanilla system or use a separate system.NPC and Companion ChangesNPC overhauls such as those that change faces of companions/npcs or hard edit names of settlers.Overhauls (faces)FollowersSettlersOtherRadio and Audio ModsSelf-explanatoryException: weapon sounds and footstep sounds - those are considered weapon and armor modifications (some mods are designed to directly edit the footstep sounds on an armor form).Visual, Texture, Atmospheric ImprovementsOnly choose one of each. Do not stack weather or lighting mods. Textures and meshes in this section are pure texture and meshes and blank plugins only.WeatherGreenifiers/FoliageTexturesLighting and Water ChangesWater mods, lightingWater is a complex object in the game world. Many mods that manipulate it, however, do so by only two methods, mesh edits or lighting edits. Mesh edits come before lighting so the lighting can then affect the new edits to meshes.Keep in mind that some lighting is not designed for use with certain meshes and certain meshes are not designed for certain types of lighting.Vanilla Settlement Changes and TweaksMods that implement changes to the workshop parent script or the workshop benchSorting ModsOnly use one. These include: Val's SortingBetter SortingAWKCR addons such as Armorsmith and UCOUgh. KeysHUD and DEF_UI ModsThese include: HUDFrameworkDEF_UIHolotimeQuick TradeTake note that some do not work due to age and the HUD being too updated, make sure to read the documentation and mod page comments on both Bethesda and Nexus. HudFramework on PC is a master file, while it is not on Xbox for load order.keyNuker has been obsolete since Nuka World DLC came out. DEF_UI, by the same mod author, replaced it as the newer When the blockade began to occur in the trmon. Pip-Boy Maps Maps Modspipboy Maps, map markers replace the characters model, improved modifiers that improve characters. Hair, hands, EVB, CBBE, makeup, new animations skin dyes such as freckles, eyebrows, makeup and scars are racing editions. The replacements are well to stack, but the hard editions for the Humanrace Archive are impossible to duplicate in multiple modifications and increased patching. Each entry has to have a unique identifier in human form. This, unfortunately, makes several animations of incompatible weapons modifications. The most new animations correctly duplicate human racesSubgraphdata to add new animations and keywords for new weapons. New weapons, armor, clothing, etc. (not elaborable) Weapon, clothing, armor lists additions that do not require AWKCr to function (these are not elements that are elements that are placed in the world) create their own modes that add artisanal articles to a chemical station or another work bank; Include a new work work development with work banks that do not add to level lists. Example of MODSWKCR MODSOTS Dependent ModSwkcr as RobotsNew settlements, Editsplayer Homesnew Cellsingleging-Counting settlements that do not disable precombines. NNEW Questscarger edits that include NPCSweapons and armor added to the world, not in the lists or daily art. Armor modifications New Barrels New Weapon and Faststep Sounds in previous weapons and armor; Example Modsecilibriumse-Through Scopesscapping, World Editions, Landscape and Editions of Land that deactivate the Precombinas. It also contains world editions that break and rebuild the precombin. Just choose a desguace. Perform the documentation carefully, for example, the SIM settlements and the immersive game contain dismantling so that there is no need for another mod desguace, desguace,ragul orto nºÃgnin ne ¡Ãranoicnuf on euq amicne rop asoc reiuqlauc a sehctaP otelpmoc ogol¡Ãid ed zafretnIragul reiuqlauc ne raguL lanimreT taehC n³Ãisremni otla ed ogeuj le raluna natisecen euq selaicepse senoicacifidoM .agrac ed nedro al ed asodadiuc n³Ãitseg anu oirasecen se y siverp a adata ¡Ãtse ejasiap led n³Ãicavele aL .seussi tuohtiw rehtegot desu eb nac rehtien tluser a
